

WSU PUYALLUP ORGANIC AGRICULTURE RESEARCH FIELD DAY

No-till and strip-till vegetables
Cover crop selection
Cover crop management
Soil quality
Organic fertility
Food safety with drip irrigation/chlorination

WSU researchers and cooperating farmers are evaluating cover crops and equipment for use in organic reduced tillage production. Come tour research plots and discuss the evolution of this production system. We are also comparing drip irrigation and water chlorination for reducing microbial contamination of produce from irrigation water.

When

Monday, August 4, 2014
10:00 AM -12:00 PM

Where

2606 W Pioneer, Puyallup, WA 98371
WSU Puyallup Research and Extension
Center

[Directions](#) | [Map](#)

Light refreshments will be provided, but feel free to bring along a brown bag lunch. *No advance registration necessary.* For more information contact Doug Collins, dpcollins@wsu.edu or 253.445.4658. *See more about the project and sign up for our e-newsletter at: <http://eorganic.info/group/4988>*

Washington State University Extension engages people, organizations, and communities to advance knowledge, economic well-being, and quality of life by fostering inquiry, learning, and the application of research. Reasonable accommodations will be made for persons with disabilities and special needs who contact Doug Collins at 2606 W Pioneer, Puyallup, WA, 98371; 253.445.4658; dpcollins@wsu.edu at least two weeks prior to the event.

This research is supported through grants from the Western Sustainable Agriculture Research and Education program and WSDA Specialty Crop Block Grant Program
